

JOURNAL PUBLICATION FORMAT

Times New Roman 14 font size Centered and Bold

The title should not be more than fifteen words

First Name Last Name (Surname) ¹, First Name Last Name (Surname) ² and First Name Last name (Surname) ³

¹Department/Research Institute, University, Country (Corresponding author)

²Department/Research Institute, University, Country

³Department/Research Institute, University, Country (Thesis adviser)

ABSTRACT

Abstract must have a maximum of 200 to 250 words only

I. INTRODUCTION

The introduction should be simple and graspable to colleagues from other fields also. Please mention the novelty of the work, purpose/objective/s and possible application in the introduction. References must be added in the text with superscripts¹.

II. EXPERIMENTAL METHOD/S

The specific techniques or procedure used in conducting this study can be explained briefly here. Describe the method used; participants (sample and sampling techniques) or source of data; research instrument/s or apparatuses used; data gathering procedures; and analysis of data (i.e., statistical tools, if quantitative). Subheadings can be used to differentiate the different methods in this section.

III. RESULTS AND DISCUSSION

In this section, try to present the data as concisely and clearly as possible. Figures, Tables and Scheme can be included. Example Fig. 1, Table 1, Scheme 1 etc.

There should be sufficient information for the reader to understand, but it is not necessary to write an extensive text to explain all the detail.

Fig. 1 - SEM (230x magnification) micrographs of the activated charcoal electrode (a) surface, (b) cross-section and (c) contact angle image

Discussion should summarize the observations and attempts to place this data into the context of the existing body of literature to express opinions about the significance of the work.

IV. CONCLUSION

This short section is to summarize the work based on the facts in evidence and point out the main areas covered in the writing. It may also contain the future directions of the work.

V. REFERENCES

References must be numbered. Keep the same style.

1. G. L. Andres et. al, A capacitive deionization system with high energy recovery and effective reuse, Energy 103, 605-617 (2016)

ACKNOWLEDGMENTS

Authors can acknowledge any person, or funding agency that has made a significant contribution to the work.

***Appendices/Supplementary Data** - may be included as supporting documents. This may contain tables, graphs, full or extract of the research questionnaires, details/pictures of apparatuses use, mathematical proofs, and other important details that may distract the reader when presented in the main body of your paper.

***Author/s note** - this contains the following information which may already be shown/footnoted in the first page of the manuscript (1) author/s full name and affiliation/s (2) email address, permanent house address.
